To Whom It May Concern:

Safe Soccer Solutions LLC is the exclusive distributor of a unique patented product in the United States and Canada:

The rights for the product are confirmed by the Exclusive Distributor Agreement, signed with the patent holder in February 2019 with a validity of 10 years.

SAFEGOAL is a unique product, which is confirmed by the patent / utility model in the United States of America (No. 200701311) and Canada, which included the section "ANTI INJURY SPORTS GOALS WITH NORMALIZED BOUNCE", with all its inherent rights, uses and actions, a patent (PCT) No. PCT / ES2008 / 07112 US Patent No. 8257205.

SAFEGOAL fully complies with all requirements for competition and training process usage in soccer and futsal. However, unlike conventional goals, which are simple metal pipes, SAFEGOAL reduces impact force when players collide with the goals by more than 44% because of the advanced safety technology:

- The inner frame is made of aluminum with special ribs that provide rigidity to the whole structure.
- The middle layer is foamed rubber. This hydrophobic material decreases force of impact when a player collides with a post. SAFEGOAL is the only such goal in the world.
- The outer layer PVC, which protects the whole structure from the external environment. An antibacterial agent is applied to the PVC to help protect from viruses. No other producer has this

Safe Soccer Solutions LLC declared that SAFEGOAL has no analogues on the market. There is no other technical solution for soccer goals, which allows both to reduce the force of collision impact and to comply with the current official FIFA and NFHS rules of soccer.

Safe Soccer Solutions LLC confirm that there are no other SAFEGOAL distributors in the USA or Canada.

Considering priority of reducing number and severity of injuries during soccer games in schools, relying on the unique characteristics of the product and the presence of single supplier mentioned above, the only possible option for purchasing goals is to purchase SAFEGOAL from Safe Soccer Solutions LLC as a Sole Source Provider.
